

VALORIS TURNKEY SOLUTIONS PVT. LTD.

ISO 9001:2015 CERTIFIED

Engineering | Management | Procurement | Execution

A UNIFIED TURNKEY PARADIGM

- One Elite Team.
- One Clear Vision.
- Zero Execution Gaps.

Industrial Infrastructure From Concept to Capital

A seamless, unified engineering ecosystem consolidating Civil Construction, Mechanical Rigging, Power Automation, Legal Licensing, Global Trade, and Project Capital Management under a single point of accountability.

USA BOOK OF WORLD RECORDS HOLDER GUIDANCE

Guided by exceptionally experienced Business Development veterans and spearheaded by a globally distinguished **USA Book of World Records Holder**. We engineer highspeed project frameworks that eliminate fragmentation and deliver record-breaking execution efficiency.

COMPLETE INDUSTRIAL EPCM, FINANCIAL & ACCOUNTING SERVICES

Complete End-to-End Solutions

Our In-House Council of Professional Experts & Technocrats

We bridge the gap between engineering, bureaucracy, and finance. Valoris executes your industrial footprint through an elite, permanent team of highly specialized professional engineers and fiscal advisors working in complete synchronization.

MARKETING & IMPEX DESK

Managing granular consumer demand mapping alongside custom global trade routing, Importer Exporter Codes (IEC), customs brokerage, and duty-deferment architectures.

ACCOUNTING & TAX DESK

Setting up full-spectrum manufacturing ERP systems, executing cost-center accounting, rigorous corporate tax structuring, and managing recurring direct/indirect statutory GST compliance.

BANK LOAN EXPERT TEAM

Formulating rigorous, bank-ready Detailed Project Reports (DPRs), executing structural financial syndication (Term Loans, CC/OD limits), and securing lucrative central/state government capital subsidies.

PROFESSIONAL LEGAL TEAM

Navigating the complex statutory landscape to manage land-use conversions (CLU), Environmental Impact Assessments (EIA), CTE/ CTO, Factory Licenses, Fire NOCs, and sectorspecific compliance codes.

PROFESSIONAL R&D UNIT

Conducting technical feasibility audits, product benchmarking, and raw material utilization analyses to ensure minimal waste and long-term tech-driven product scalability.

CIVIL ENGINEERING TEAM

Overseeing initial raw site development, heavy grading, specialized earthmoving, high-strength industrial flooring, and the rapid structural fabrication of state-of-the-art Pre-Engineered Buildings (PEB).

MECHANICAL ENGINEERS

Specialists in complex machinery rigging, heavy placement, micro-tolerance geometric alignment, utility integration (steam, gas, chilled water), and rigorous dry/wet commissioning protocols.

ELECTRICAL & AUTOMATION

Designing high-availability plant electrical infrastructure, substations, transformers, custom main LT panels, internal busduct routings, and plant-wide PLC/SCADA automated system architectures.

THE TURNKEY LIFECYCLE BLUEPRINT

Phased Industrial Execution Framework • Steps 1 to 5

PHASE I: HEAVY ENGINEERING & PLANT INFRASTRUCTURE

1. MARKET RESEARCH & STRATEGIC PRODUCT DEVELOPMENT

Executing technical data collation on market demand, consumer demographic segments, competitor price strategies, and commercial scalability maps to match plant capacity to market gaps.

2. GLOBAL IMPORT/EXPORT (IMPEX) & SUPPLY LOGISTICS

Arranging international trade documentations, Importer Exporter Codes (IEC), customs duty clearances, freight forwarder alignments, and end-to-end inbound asset procurement work flows.

3. FINANCIAL SUPPORT & INSTITUTIONAL BANK LOAN SYNDICATION

Drafting bank-compliant Detailed Project Reports (DPRs), managing total liaisoning for major corporate Term Loans and Cash Credit (CC/OD limits), and maximizing central/state MSME subsidy benefits.

PHASE II: REGULATORY CLEARANCE & WORKFORCE ARCHITECTURE

4. INDUSTRIAL ACCOUNTING & STRATEGIC TAXATION COMPLIANCE

Integrating accounting ERP software tailored for complex multi-product manufacturing, structuring corporate taxation paths, and leveraging duty-saving frameworks like EPCG and bonded warehousing (MOOWR).

5. REGULATORY APPROVALS & LEGAL LICENSING FRAMEWORKS

Managing complex state and central bureaucracy to secure critical building clearances, Consent to Establish (CTE), Consent to Operate (CTO), Factory Licenses, and sector registrations (FSSAI, CDSCO, PESO).

COMMERCIALIZATION & FINANCIAL INFRASTRUCTURE

Market Penetration, Strategic Fiscal Operations & Contact • Steps 6 to 11 PHASE III: PRODUCTION STABILIZATION & MARKET ENTRY

6. CIVIL CONSTRUCTION & INFRASTRUCTURE DEVELOPMENT

Complete civil earthworks, foundation casting, heavy-load road networks, structural PEB framework assembly, and specialized, contamination-controlled clean rooms built precisely to international industrial codes.

7. ADVANCED MACHINERY INSTALLATION & COMMISSIONING

Precision logistics for heavy asset placement, strict axis alignment, process-fluid piping networks (air, gas, water lines), and meticulous testing protocols to guarantee maximum baseline machinery throughput.

8. COMPREHENSIVE ELECTRICAL GRIDS & PLANT AUTOMATION

Deploying robust, safe plant electrical architecture from High Voltage substations and transformers down to distribution switchgears, internal illumination arrays, and synchronized PLC/SCADA centralized dashboards.

PHASE IV: FINANCIAL INFRASTRUCTURE CORPORATE CAPITAL

9. WORKFORCE STRUCTURING & OPERATIONAL TRAINING SYSTEMS

Sourcing highly qualified senior plant managers, shift technicians, and safety crew. Drafting strict operational Standard Operating Procedures (SOPs) and coordinating manufacturer-led equipment hand-offs.

10. PRODUCTION OPTIMIZATION & QUALITY CONTROL SETUP

Monitoring initial material batches to reduce process cycle times, implementing lean manufacturing matrices (Kanban systems), minimizing floor waste, and formatting for ISO 9001/14001 compliance.

11. AI-Powered Advertising & Brand Media

Hyper-realistic visual production, AI audience targeting and automated multi-channel campaign

12. FIRE SAFETY & INDUSTRIAL SUPPRESSION INFRASTRUCTURE

Deploying integrated fire networks—from hydrant loops and detection arrays to SCADA alarms and emergency response frameworks.
